#### **Casual InfoVis**

CS 7450 - Information Visualization April 19, 2011 John Stasko

Guest Speaker: Zach Pousman

#### **Casual InfoVis**

 Let's start off with ideas and concepts from the paper...

> Casual Information Visualization: Depictions of Data in Everyday Life

Zachary Pousman, John T. Stasko, Member, IEEE, and Michael Mateas

Abstract—Information visualization has often focused on providing deep insight for expert user populations and on techniques for amplifying cognition through complicated interactive visual models. This paper proposes a new subdomain for infovis research that complements the focus on analytic tasks and expert use. Instead of work-related and analytically driven hindow, we propose Casual information Visualization (or Casual Infovis) as a complement to more traditional infovis admittantic traditional infovis, we propose casual information Visualization (or Casual Infovis) as a complement to more traditional infovis domains. Traditional infovis, we propose determination of the second s

Index Terms-Casual information visualization, ambient infovis, social infovis, editorial, design, evaluation

 1 INTRODUCTION
 Are these types of tools really infovis systems? The question arises, where are the limits of infovis with respect to the everyday uses of oregret users who have knowledge and experience in analyzing roty-lems in specific domains. Workers in widely varying domains from finance information visualization.
 Are these types of tools really infovis systems? The question arises, where are the limits of infovis with respect to the everyday uses of computational artifacts.

# **Casual InfoVis**

- Let's start off with ideas and concepts from the paper...
- A complement to the majority of `central' infovis; which is a focus on analytic tasks and analysts as the idealized user.
- Infovis for the everyday person
- Spend some time looking at the 'edges' of the infovis domain

Spring 2011

CS 7450

3

4

#### **Definition of casual infovis**

 Casual Infovis is the use of computer mediated tools to depict personally meaningful information in visual ways that support everyday users in both everyday work and non-work situations.

# **Changes to traditional notions**

- The user population
  - Expand to include many more kinds of people and many more situations and scenarios.
  - People who are not explicit or implicit analysts
  - Non-professionals in general
  - Low(er) motivation

# **Changes to traditional notions**

- Usage pattern
  - New patterns of use that depart from the more traditional deep-dive explorations and sensemaking
  - In a word, more *casual*
  - Fleeting awareness and monitoring tasks
  - Could also include more substantial reflections
  - Mobile and ubiquitous, not just desktop

Spring 2010

CS 4460/7450

#### **Changes to traditional notions**

- Data types also change
  - Often personally relevant (about 'me')
  - Tight coupling between user and the data
  - Tight coupling gets at what is *meaningful* about the data stream... not always what is *important*. Sometimes the most minute and boring detail is still very meaningful.

CS 4460/7450

# **Changes to traditional notions**

- Insight
  - Gets a one of the fundamental questions of infovis. We all agree that the purpose of infovis is insight... *Do you agree?*
  - But the examples on the edges show different kinds of insights.
  - Maybe insights are not perfectly quantifiable in a way that's rigorous

(for an attempt see Saraiuya and North 2005)

## Areas to explore for today

- Artistic InfoVis
- Ambient InfoVis
- Social InfoVis

#### **Artistic InfoVis**

CS 4460/7450

#### **Artistic InfoVis**

 Artistic expression using visualizations of data

- They are not just generative art they still read data, represent it, and some are interactive
- Systems often depart from the central notion of infovis that first and foremost, a visualization should be easy to read.
- Also can 'problemitize' the data...

CS 4460/7450

#### **Many examples**

# **Ambient InfoVis**

# **Objectives**

- Systems so far
  - What is their purpose or objective?
     High-level purpose or task
  - Analysis, Exploration, Learning
- Are there other high-level tasks that infovis can assist with?
  - Awareness, monitoring

Spring 2010

CS 4460/7450

**Central idea** 

- People interpret images well
- As they say, a picture's worth thousand words ... so use visualization for information awareness

CS 4460/7450

# **Calm Technology**

- Mark Weiser
  - "A calm technology will move easily from the periphery of our attention, to the center, and back."

Spring 2010

CS 4460/7450

**Ambient Displays** 

- Conveys low- to medium-priority information to people, while residing in the periphery of their attention
- Other terms sometimes used
  - Peripheral display, notification system

CS 4460/7450

# **Ambient Displays**

- Purpose:
  - Information awareness, perhaps monitoring
- Focus:
  - Aesthetics

Visually pleasing enhancement to surroundings

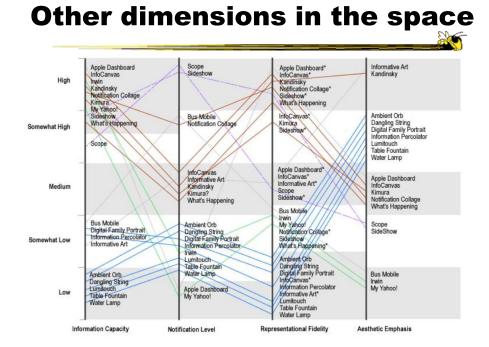

Spring 2010

CS 4460/7450

39

# Other dimensions in the space

Information capacity How much info can they transmit? Notification level Are they subtle or more attention-grabbing? Representational Fidelity Flexibility with regard to data mappings Aesthetics Visually pleasing enhancement to surroundings

# **Ambient InfoVis**

InfoVis off the desktop

- Still visually encoding information, but not for analytic purposes
  - Presenting the information in places where you're not doing "desktop computing"

CS 4460/7450

e 🔪

#### **Examples**

43

 Let's look at some examples of ambient displays or ambient information visualizations

Spring 2010

CS 4460/7450

**Dangling String** 

Plastic spaghetti wire hanging from ceiling

- Hangs from motor in ceiling
- Electrically connected to ethernet cable so bits going by cause it to jiggle
- Created by artist Natalie Jeremijenko

Spring 2010

#### **Ambient Room**

- Use variety of physical objects in office to communicate the state of relevant information
- Hiroshi Ishii's group at MIT

Spring 2010

# **Information Visualizations?**

- Well, they are visually presenting information
- But perhaps not an emphasis on the *information* 
  - More about peripherality, calmness, aesthetics

Spring 2010

CS 4460/7450

**Other Styles** 

 Another set of techniques/systems focus less on aesthetics and more on the quality of information conveyance

CS 4460/7450

#### **Ticker Displays**

 Animated text strings (ticker, fade, roll, blast) typically in periphery of person's monitor

Fitzpatrick et al CHI '99 Extended Abstracts McCrickard et al IJHCS '03

# Ambience

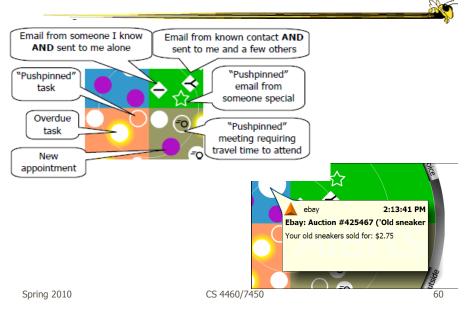

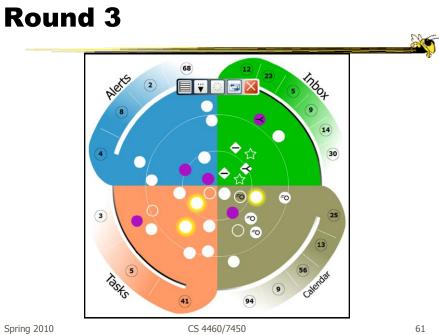

#### Redesign

Spring 2010

#### Encoding

#### Kandinsky

- Generates aesthetic information collages
- Information Collage: Ambient information display of an object
- Aesthetic Template: Express Aesthetic concepts in visual form

		Fogarty, Forlizzi & Huds UIST `02	on
10	CS 4460/7450		63

Spring 201

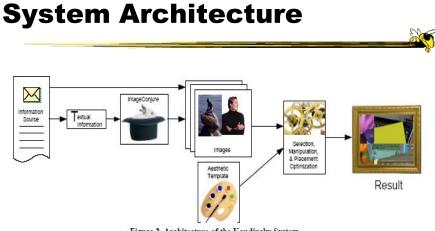

Figure 2. Architecture of the Kandinsky System

#### **Representative Images**

- ImageConjure subsystem
  - Converts text into representative images
  - Selects from large photo/clip art collections
  - Uses a textual summary; prepared by a person
  - Scores the images; returns the best matches

Spring 2010

CS 4460/7450

ImageConjure Results

From: PhotoDisc Inc. (24,000 images) and Hemera Inc. (50,000 images)

Spring 2010

CS 4460/7450

#### **Optimization Process**

- Configuration of components (selection of information images, placement within collage)
- Uses aesthetic templates and "temperature" parameter
- 4-Layered Regions
  - Fixed visual elements
  - Initial image selection and placement strategy
  - Evaluation criteria
  - Post-processing

Spring 2010

#### Summary

 Less information conveying, more aesthetic appeal

Figure 7. Example Results

Spring 2010

# **Informative Art**

- Electronic paintings—Flat panel LCDs hung on the wall
- Abstract art in which aspects of the picture change to signify underlying data values

CS 4460/7450

 From Future Applications Lab, Viktoria Institute, Sweden

Redstrom et al DARE '00

Skog et al InfoVis `03

Spring 2010

#### **Design Criteria**

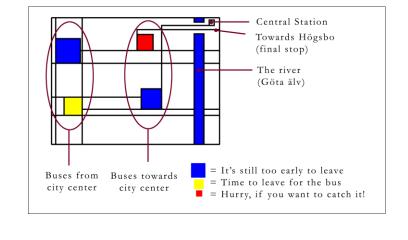

Communicate useful information

- Blend in with surroundings and be appealing to look at
- Minimize animation Don't want to draw the eye too much

CS 4460/7450

### Example

#### Mondrian

Spring 2010

CS 4460/7450

73

#### Example

#### Andy Warhol

Cans gradually change from asparagus soup to tomato soup to signify upcoming event

#### **Lessons Learned**

- Find info relevant to place where display is located
- Rate of change of info should be enough to promote relevance and draw interest
- Base visualization on artistic display, may support readability and promote comprehension
- Let features of info source affect visual encoding to improve memory of mapping

Spring 2010

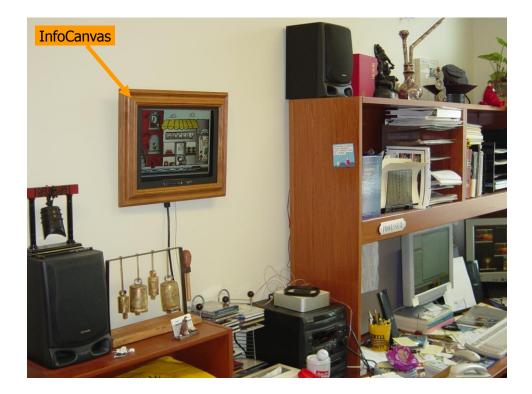

CS 4460/7450

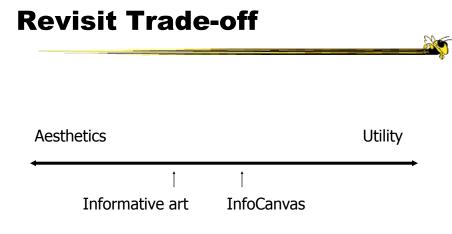

InfoCanvas

- Information Art–Similar approach as in Viktoria project
- Electronic painting deployed on LCDs in the environment
- Focus: User-driven views
- II group at Georgia Tech

Stasko et al Ubicomp `04

CS 4460/7450

# **Objectives**

- Personalized
  - Display individual's personal information
- Flexible
  - Variety of info sources and representations
- Consolidated
  - Present multiple data items on one display
- Accurate
  - Be clear, and highlight uncertainty
- Appealing
  - Fun to use, aesthetically pleasing

Spring 2010

CS 4460/7450

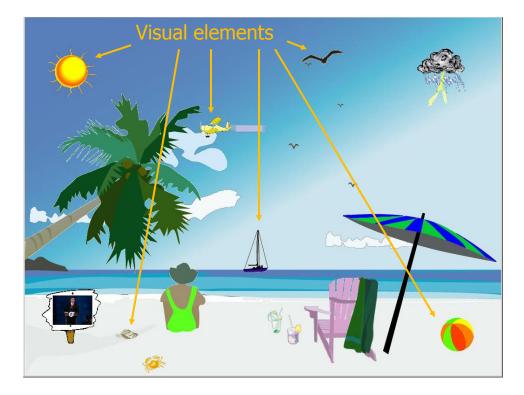

79

CS 4460/7450

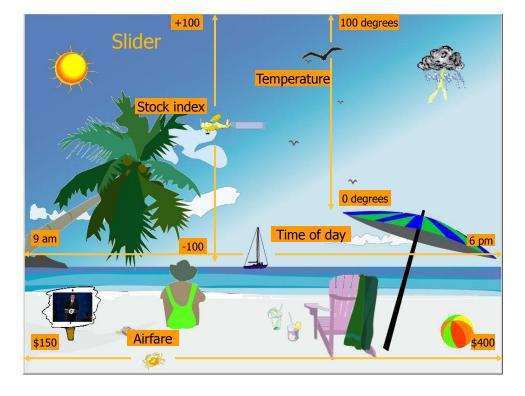

# **Transformations**

- Slider
- Image swapper
- Appearance
- Scaler

Spring 2010

- Populater
- Projector

CS 4460/7450

# **Other Example Themes**

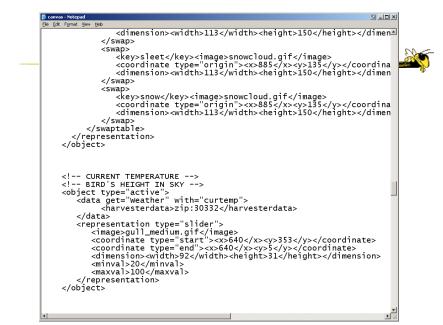

## Implementation

- Java application
- Data harvester classes
- Painting specified through XML file
- System establishes data->visual mapping and polls data sources to maintain current representation

Spring 2010

CS 4460/7450

91

Spring 2010

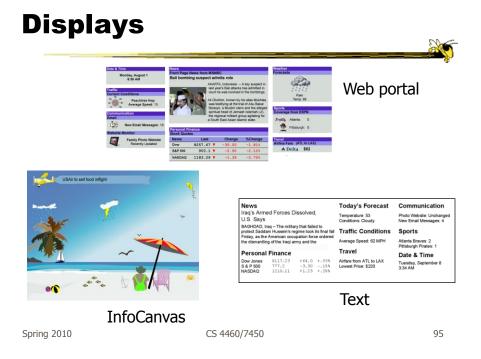

## **Evaluation: Laboratory**

- Information Conveyance
  - Compare InfoCanvas to web portal to text display for acquisition and memory of different information sources
  - Evaluate viewing "at a glance"
  - Empirical study with 49 participants

Plaue, Miller & Stasko GI '04

Spring 2010

# **Information Nuggets**

time of day	weather forecast	
temperature forecast	traffic conditions	
stock update	airfare prices	
website updates	new emails	
baseball score update	news headline	

#### Methodology

- Within subjects
- Participants view display for 8 seconds then receive questionnaire about state of 10 items
  - Vary order of topics on questionnaires
- Three trials with each display type

Spring 2010

CS 4460/7450

**Recall Questions** 

What is the current time of day?	What is the current news headline?
4:32 AM	Pair pleads not guilty to embezzlement
7:40 AM	Pair pleads guilty to obstruction charges
3:20 PM	Jury hung on money launderer
7:55 PM	Couple found not guilty on conspiracy charge
What is the lowest airfare price from Atlanta to Los Angeles? \$330 \$292 \$160 \$99	How many new emails were present? 22 16 1 0

CS 4460/7450

#### Results

	lives Toda's Finical Commication	1st Trial	2nd Trial	3rd Trial		
	Next And Trans Carden And Trans And Tr	5.14 (1.59)	5.12 (1.33)	5.02 (1.57)		
		5.67 (1.61)	5.65 (1.54)	5.29 (1.89)		
		6.27 (1.80)	6.22 (1.79)	6.31 (1.76)		
	Statistical Significance for: InfoCanvas over Web Portal Web Portal over Text-Based InfoCanvas over Text-Based					
)10		CS 4460/74	150		99	

Spring 2010

#### Results

- Statistically significantly more information recalled with InfoCanvas than portal and more with portal than text
- Pictures helped
  - Participants were able to rapidly learn mappings
  - Strange mappings didn't hurt

# **Evaluation**

- Usage Study
  - Eight trial users ran system for a month
  - Selected own information to monitor and designed own scene from an existing theme
  - We implemented the view
  - Picture frame monitor deployed in office

Stasko et al GVU TR

Spring 2010

CS 4460/7450

101

# **Evaluation Dimensions**

- Usefulness
- Personalization and flexibility
- Aesthetics
- Distraction
- Novelty and fun
- Summary impressions

#### **Results - General**

- 6 themes chosen
- 6 17 visual elements
- Participants easily remembered mappings
- Swapper, slider, and image display were primary transformations
- More direct than abstract mappings, but significant amount of each
- Felt it was fun and useful

Spring 2010

CS 4460/7450

Usefulness

P1: "*I could just glance over* and check out something without searching for it like going to Yahoo weather. It saved me time. It was quick. It was easy to learn for me, what things meant, kind of quick."

P6: "I like the fact that I can look at it in *one quick glance* and get it OK, then return to what I'm doing. With a website, I can take a half hour there."

P4: "It's *useful without being irritating*...this doesn't feel heavy. Now of course one of the reasons it doesn't feel heavy is because it's sort of out of my normal line of sight. It's in a sort of natural place where when I lean back and I'm staring off so I can kind of get it. So my eyes kind of drift there through the natural course of things when I'm not particularly concentrating on something else. So it's been positive—it's been useful without being terribly distracting. It hasn't been distracting at all. It's there when I need it, but doesn't require me clicking and mousing."

CS 4460/7450

#### **Lessons Learned**

- Ubiquitous computing technologies can operate effectively in the field
- Consolidating information is valuable
- Abstractness/symbolism can be beneficial
- "Push" technology merits reconsideration
- Personalization is important
- Better customization tools are needed

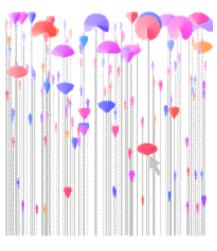

Spring 2010

'We Feel Fine' (2007) Spring 2010

#### In sum...

- Different kinds of `insight'
  - Analytical insights (more traditional concept)
  - Reflective insights
  - Awareness insights
  - Social insight

Spring 2010

CS 4460/7450

In sum...

 Info Vis is moving into lots of life, not just desk work and data analysis by experts

- News, commerce, story-telling, sociality
- Self-reflection
- One way to help manage information overload
- Requires a change to evaluation techniques (what matters is changing)
- Opens new design spaces

Spring 2010

CS 4460/7450

## Thanks!
